

Cross-Sell Your Way to Profits with **BÓKUN**

Create Your Own Cross-Selling Marketplace

Bókun is a community-based tourism sales platform that enables the cross-selling of travel products to enhance both the customer experience and revenues for those connected to the platform.

Cross-Sell & Collaborate

Accommodations, rental cars, tours and activities - even transportation - all from multiple suppliers, all bookable in a single shopping cart online or in person in real-time. Using Bókun, you can make commission contracts with the suppliers you want to work with, invite them to collaborate on the platform and have direct real-time access to their inventory. No more phone calls or emails. You get instant confirmation when booking.

Sell Online

You can sell your own and your supplier's products online by using Bókun's mobile friendly, easy to implement booking widgets. Create innovative packages that can include your suppliers products and have them selected and paid for right on your own website.

Automatic Tracking of Commissions

When dealing with multiple suppliers and sellers, tracking commission and managing invoices is a time-consuming task. Bókun tracks commission for all bookings and creates your invoices automatically. As bookings arrive, the platform presents you with a clear breakdown of your payables and receivables.
